Instructor: Dr. Igor Belykh  
Office: # 470M, Ten Park Place  
Phone: (404) 413-6411  
E-mail: ibelykh@gsu.edu  
Web page: http://www.mathstat.gsu.edu/~matixb/  
Office hours: MW 4:00 pm – 5:00 pm, or by appointment

Prerequisite: Grade of C or higher in Math 2215 Multivariate Calculus and Math 3000 Bridge to Higher Mathematics

Course content: Sections: 1.1-1.5 1.7-1.10; 2.1-2.3; 3.1-3.2, 4.1-4.6, 4.9, 5.1, 5.2, and 5.3. Students are expected to learn and demonstrate the ability to give precise statements of theorems and definitions; to read and write proofs of mathematical properties related to linear algebra; to explain linear algebraic concepts clearly; and to perform computations and derivations related to the course content.

Administrative Drop Policy: During the first two weeks of the semester the Department of Mathematics and Statistics checks the computer records to determine whether or not each student has met the prerequisites for the course. If you do not have the prerequisites, please so inform your instructor and change to another course right away. If our computer search finds that you do not have the prerequisite, you must drop this course or you will be dropped automatically. If you do not attend the class during the first two weeks you will be administratively dropped.

Attendance policy: A student is considered present only if he/she has arrived on time and remains until the class is dismissed. Coming to class late or leaving early is disruptive and thus discouraged. The instructor may drop a student from the roll for exceeding four class absences. Students are responsible for all material covered in the book and in class. Those who have excellent attendance but are on a grade borderline will get extra consideration at the end of the class.

Examinations: Three class tests will be given this semester the dates of each of these tests will be announced about one week in advance. There will also be a final exam, which is scheduled for Monday, May 6th at 7 p.m. Books and notes will not be allowed on all tests. There will be no make-up exams except in an extreme verifiable emergency. Absence from the final exam will result in a grade of F for the course unless arrangements are made prior to its administration.
Grading: There will be a total of 600 points possible for this course. The points are distributed as follows

- Three exams \( 300 = 100 \times 3 \)
- Final exam \( 200 \)
- Three Quizzes \( 60 = 20 \times 3 \)
- Extra Credit \( 40 \)

Your total accumulated points will determine your grade

- 97%-100% of the maximum = A+
- 90%-96% = A
- 87%-89% = B+
- 80%-86% = B
- 77%-79% = C+
- 70%-76% = C
- 60%-69% = D
- 0%-59% = F

Procedures: Class meets twice a week. Taking good notes during the class is of significant importance. Homework will be assigned in each class. After the class, read the book, read your notes and do as many of the homework problems as you can prior to the next class. Try to get the remaining problems explained in the next class. You are responsible for all material covered in class, whether or not you attended this class.

Withdrawal: March 5 is the last day to withdraw and receive a possible grade of W except for hardship withdrawal. A grade of W will only be assigned to a withdrawing student, if the student is passing at the time of withdrawal.

Academic Dishonesty: Plagiarism and cheating are serious offenses and may be punished by failure on the exam. Repeated cheating will result in a grade F for the course.

Homework: Working on the homework assignments is an essential part of the course. It is critical for your success on the exams.

This course syllabus provides a general plan for the course; deviations may be necessary.

GOOD LUCK!
