Lecture: 1:30–2:45pm @ 302 Sparks Hall (SH), Monday and Wednesday.

Office Hours: 3:00–4:00pm Monday and 2:00–3:00pm Thursday (at 766 COE). Or by appointment.

Course content/outcome: The course offers a solid introduction to ring theory covering its most basic concepts. The course will emphasize the understanding of the concepts, through examples and proof writing. The course will study algebraic structures through an axiomatic approach. In particular, the course will cover rings, fields, polynomials, Gaussian integers, matrices, homomorphisms, ideals, quotient rings, unique factorization rings, etc. The students passing the course will be able to present the proofs of the majors results as well as apply them in solving routine exercises.

Prerequisite: Math 4441/6441 with a grade of C or higher, or equivalent. During the first two weeks of the semester the Department of Mathematics and Statistics checks the computer records to determine whether or not each student has met the prerequisites for this course. If you do not have the prerequisites please so inform your instructor and change to another course. If you do not attend class during the first two weeks you will be administratively withdrawn.

Homework: There will be weekly homework assignments that will be graded. You can discuss the problems among yourselves, but the write-up of the solutions has to be done individually according to your own understanding. Identical solutions will not be graded. The assignments as well as the exams for Math 6442 will be more involved than the ones for Math 4442. Show your work/steps. No late homework is accepted. Homework weighs 25% of your overall performance.

Exams: There will be two midterm exams and one final exam, all held at 302 Sparks Hall (SH).

The final exam is comprehensive and required. Also, the final exam grade will replace one (and only one) of the lowest midterm grades in case the final exam grade is higher. No midterm exam grade may replace the final exam grade. Make-up exams will only be allowed for extreme emergencies that must be documented, such as medical emergencies. It is the instructor’s role to determine if a specific emergency is a valid one.
