</table>

2. Project Description

Faculty in the College of Health and Human Sciences are being encouraged to develop courses (both existing and new) that will have greater use of computer technology. As part of this effort, selected faculty members have been specifically requested to develop on-line courses in their disciplines. These faculty members include Dr. Sarah Eschholz in the Department of Criminal Justice, and Drs. Reuben Restrepo and Linda Thomas-Goodfellow in the Department of Cardiopulmonary Care Sciences. This request is for two graduate laboratory assistants (GLA I) who have knowledge of web-based computing to assist these faculty in their course development. Ultimately the development of these courses will enable wider student access to these disciplines and will help students with transportation difficulties meet some of the needs of their academic programs.

3. Relevance to Regents Guidelines

[1] Technology fee revenues should be used primarily for the direct benefit of students to assist them in meeting the educational objectives of their academic programs.

   This request is to provide software packages that will increase accessibility of courses and course materials to students, and enable students who might otherwise be unable, to pursue their desired academic goals. This will directly benefit students in helping them meet their educational objectives (Regents guideline 1).

4. Justification of One-time Funding Requirements

   We are requesting funding for 2 Graduate Laboratory Assistants (GLA I) for the standard hiring cost of $900.00 per GLA for a total cost of $1,800.

5. Continuing Funding Requirements

   -NONE-
6. Accountability of Funds

Funds will be managed through the office of Anthony Roberts, the business manager for the College of Health and Human Sciences, who will use standard University accounting protocols.

7. Additional Funding Required, Non-Technology Fee

-NONE-

8. Impact on Computing/Network Infrastructure

There will be more websites accessed through Georgia State University systems.
