</table>

2. Project Description

Faculty in the College of Health and Human Sciences are being encouraged to develop courses (both existing and new) that will have greater use of computer technology. As part of this effort, faculty will be developing websites that will support their instructional efforts. This request is to purchase ten copies of the “Dreamweaver” software package, to initiate the website development effort by selected faculty in the college. There are no site-licenses available from the company that develops “Dreamweaver”, so individual software packages must be purchased.

3. Relevance to Regents Guidelines

[1] Technology fee revenues should be used primarily for the direct benefit of students to assist them in meeting the educational objectives of their academic programs.

This request is to provide software packages that will increase accessibility of course materials to students, and allow for efficient web-based (computer) dialogue between the instructors and students. This will directly benefit students in helping them meet their educational objectives (Regents guideline 1).

4. Justification of One-time Funding Requirements

We are requesting one-time funding for the purchase of “Dreamweaver” software, at a cost of $100 per package x 10 for a total cost of $1,000.

5. Continuing Funding Requirements

-NONE-
6. Accountability of Funds

Funds will be managed through the office of Anthony Roberts, the business manager for the College of Health and Human Sciences, who will use standard University accounting protocols.

7. Additional Funding Required, Non-Technology Fee

-NONE-

8. Impact on Computing/Network Infrastructure

There will be more websites access through Georgia State University systems.
