Graduate Nurse Internship Program  
Start Dates: June 6 and June 20, 2005

We here at Baptist Health know how exciting, thrilling and frightening being a new graduate nurse can be. Will you get the support and orientation you need? We hear you and have developed a program designed especially for you.

The Orientation Unit at Baptist Medical Center’s downtown campus in Jacksonville, Florida is a unique blend of medical/surgical, telemetry and progressive care patients. The unit has been designed to nurture, develop and enhance your clinical skills.

Each Graduate Nurse works with a highly skilled clinical preceptor throughout the orientation process. The GN starts with one patient and over a 20-week process, advances to a full patient complement under the guidance and direction of the preceptor. In addition to bedside education, the Graduate Nurse participates in on-unit educational activities designed to improve critical thinking and clinical competence. As your skills and confidence grow, you will explore the many clinical opportunities available on campus.

In addition to the clinical support of the preceptors, the New Hire Support Nurse is there to help facilitate the transition from new graduate to registered nurse.

We hope you come and look at what we have to offer at Baptist Health. You can depend on us for life.

Opportunities available to specialize in ER, LDRP and Critical Care.
